Best Mac Bronzer For Medium Skin

On my pale skin the colour looks tan rather than orangey like some bronzers It adapts to your skin tone and leaves you looking tan without making it look like youve applied 100 layers of orange makeup.. Available in: Bronze, Golden, Matte Bronze and Refined Golden As part of the beautyheaven rewards program, all members receive 5 points for each review they submit.. While I like to warm up my complexion with a little bronzer from time to time, I find these shades are a little too warm toned for my complexion.. It just comes off looking very natural and sunkissed, like how us ghosts would tan if we could.. There are a few different color shades to choose from, from matte to a shimmer, meaning you can choose one just right for your skin tone.. It presents in a beautiful little flip pallete, and is so easy to use It is a really pigmented color, so you can start of really light and build up with just one small swipe of the brush.. Very fair on price, not overly expensive but lasts a long time I love that it is not over powering and you can naturally build up the colour depending on how bronzed you would like to look.. Ive had products like that before where you kind of need to give them a bit of a kick but eventually I got the colour and powder going.

Best Bronzer For Medium Skin Whatsoever UnlessYes, its bronzey like a bronzer should be, but it has the most perfect warm sort-of red undertone to it.. Easy to apply and long lasting all over the face or concentrating on the cheeks but I think it would apply even better with one of the MAC brushes.. Highly recommend this to anyone looking for a new all-over type of bronzer, its amazing.. It is also cool toned so it give you a natural glow on your skin This bronzer is completely matte Looks good on me when Im tanned (NC30) and untanned (NW20).. But can be used for multiple purposes - contour, eye shadow, all over light bronzer.. The colour is amazing not too orange or brown its the perfect inbetween Best used with a contour brush first then use the same bronzer over the top to create the perfect chizzled check bones and a nice sunkissed glow.. Best Bronzer For Medium Skin Whatsoever UnlessIt does have a glitter throughout it, though this is hardly noticable on the skin whatsoever unless you look super closely.
